## ***Introduction***

HANSON International has sponsored a Sport-Race championship by providing trophies to the Champions. Technical regulations and the running of the events are handled by the Balsa Beavers

The championship consists of a series of races each summer with points awarded for the finishing position in each race. The series hosts two championships: one for the Team, and one for the Pilot.

The Team & Pilot championships are independent, so Teams have the option to choose different pilots during the season, and Pilots can choose to fly for different teams. Teams score their respective points regardless of who the pilot is, and Pilots score their respective points regardless of the team for which they fly.

At the end of the year the Team & Pilot with the most accumulated points is crowned respective Champions.

From 2012 to 2016 the championship comprised the season's LA 25 Sport Race series. With the OS 25LA engine out of production, the championship comprised the season's LA 15 Scale Race series beginning in 2017.
