

Balsa Beavers Model Flying Club Safety Plan 2021

1. All members using the Centennial Park Control Line Flying site should maintain the physical distancing.
2. If the airplane model needs to be held by a helper and pilot is starting the engine, they both should wear face masks and gloves.
3. Electric models do not usually require helpers, therefore a pilot does not have to wear a mask when preparing for flight.
4. If helper picks up the C/L handle, he/she should wear gloves
5. When the pilot picks up his handle and flies, the mask is not required.
6. It is recommended to clean/wash hands after flying.
7. For additional information please consult the City Covid-19 guidelines.
